Project Experience

Cliccon Mobile App - <https://play.google.com/store/apps/details?id=com.clicconmobile> October 2017

- Helped in a mobile application development in React Native with Express and MongoDB backend to help travelers find their loved product anywhere in the world
- There are a lot of interesting challenges in this application, like implementing geolocation and offline mode features

Diák Center Website - <https://diakcenter.hu> March 2017

- Created web design and developed a custom Wordpress site for a student HR agency based in Hungary.
- Helped students to get a job more easily, generating an increase in the number of monthly registered students by 40% as a result of the project.
- Created user-friendly interface and attracted new customers by using responsive design elements

Men's Stuff Webshop - <http://mensstuff.hu> April 2016

- Developed a Wordpress, Woocommerce webshop with a modified theme to reach business needs
- Result: Every beauty box was sold in 2 days

Work Experience

Self-Employed - Professional Freelancer Remote | June 2015 - Present

- Complete all project phases, from discovery (user research, wireframing), through prototyping, design, development, and long term maintenance.
- Constantly learning lots of useful business and tech skills in my freelance projects, like full-stack development and business management

Bene Studio - Full-Stack Developer Budapest, HU | June 2017 - February 2018

- Creating smart healthcare applications mostly with Javascript in React, React Native.
- Developing one of the biggest project in the company and leading as a scrum master
- Author a tech blog on Medium

Scolvo - Front-End Developer Budapest, HU | October 2016 - June 2017

- Developed our platforms front-end interface using AngularJS, TypeScript and KnockoutJS
- Created more than 50 great-looking web forms, which was the key product of Scolvo
- Worked on our platforms Admin UI in AngularJS to provide more user friendly experience to our partners
